

Dutch farming in an international context

Ambitious by nature

oktober '11

Berry Marttin, Executive Board Member Rabobank Group

Developments up to 2050

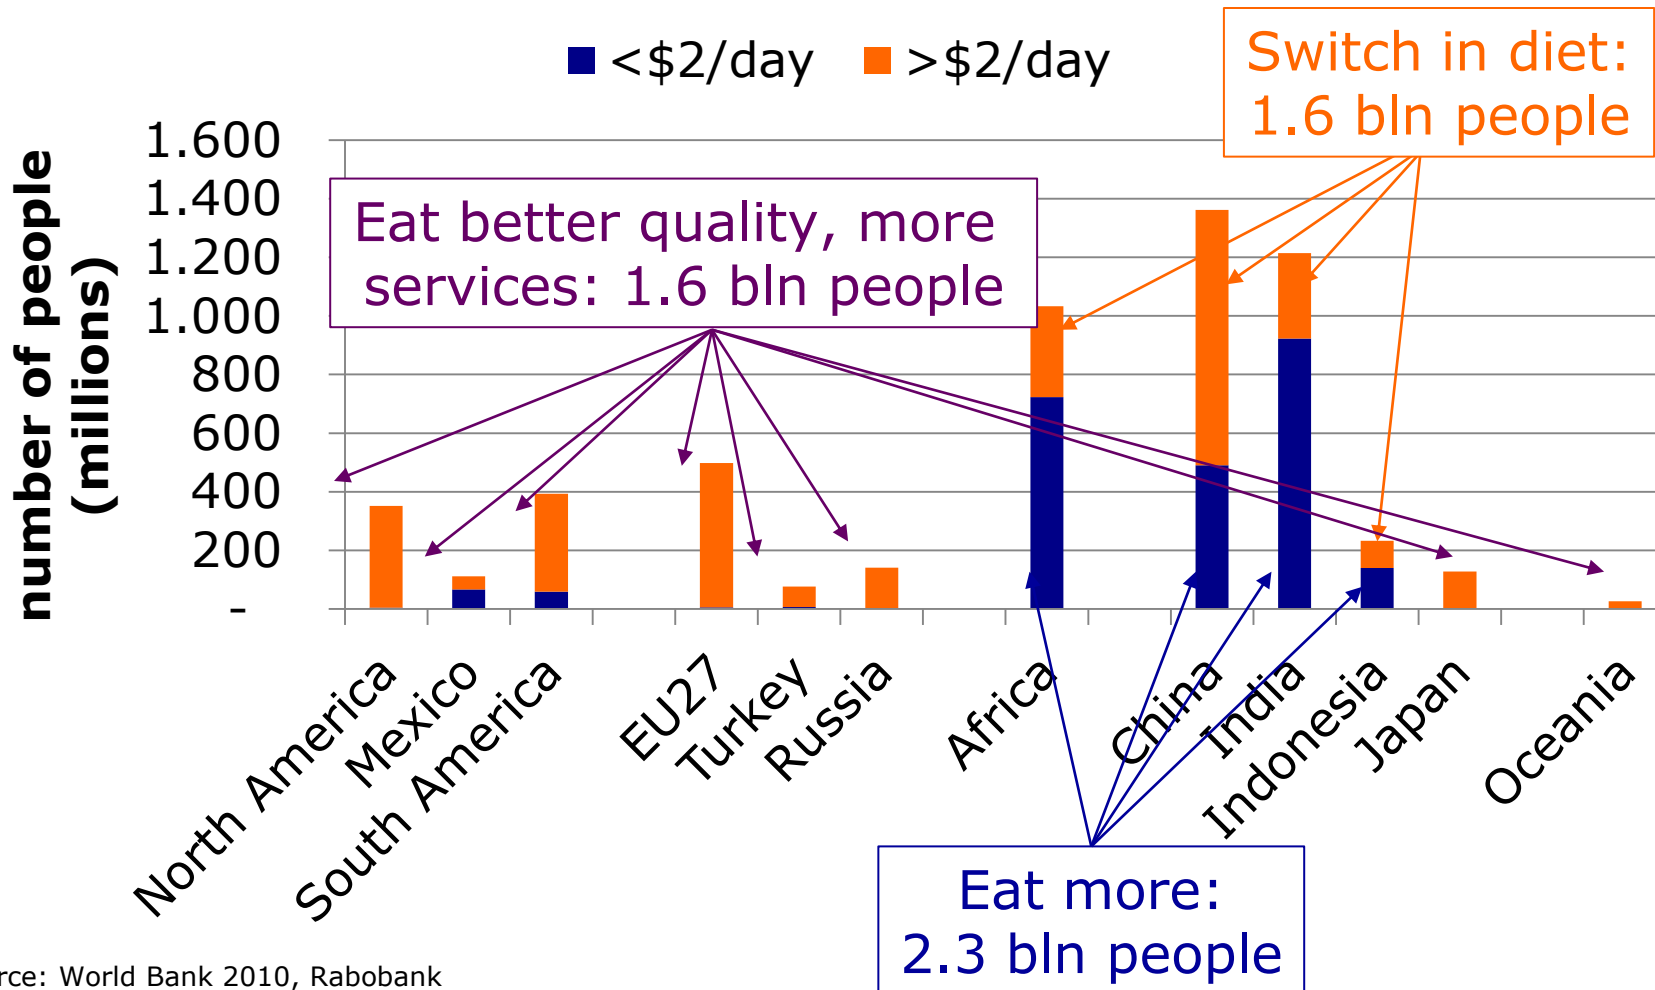

Population to grow
from 7 to 9 billion
people

Economic growth
drives switch in
diets in emerging
economies

Land expansion no
more than some
10%; less water,
less fertiliser

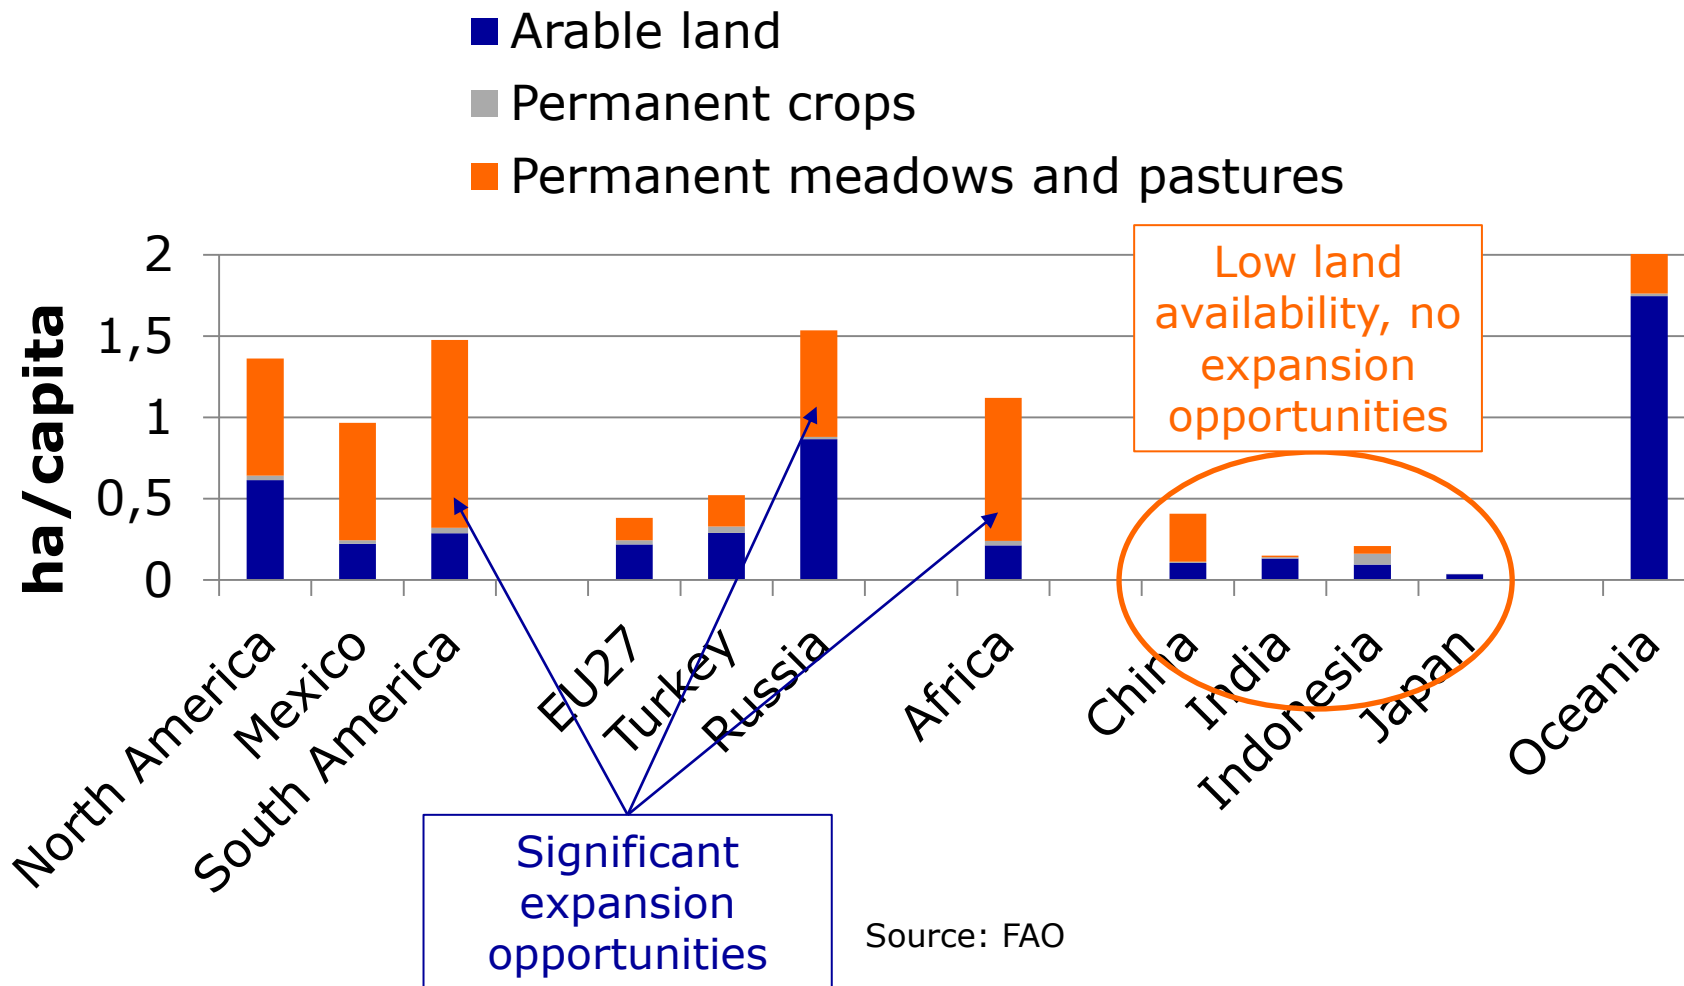

Productivity growth
is crucial

Effect of growth and prosperity

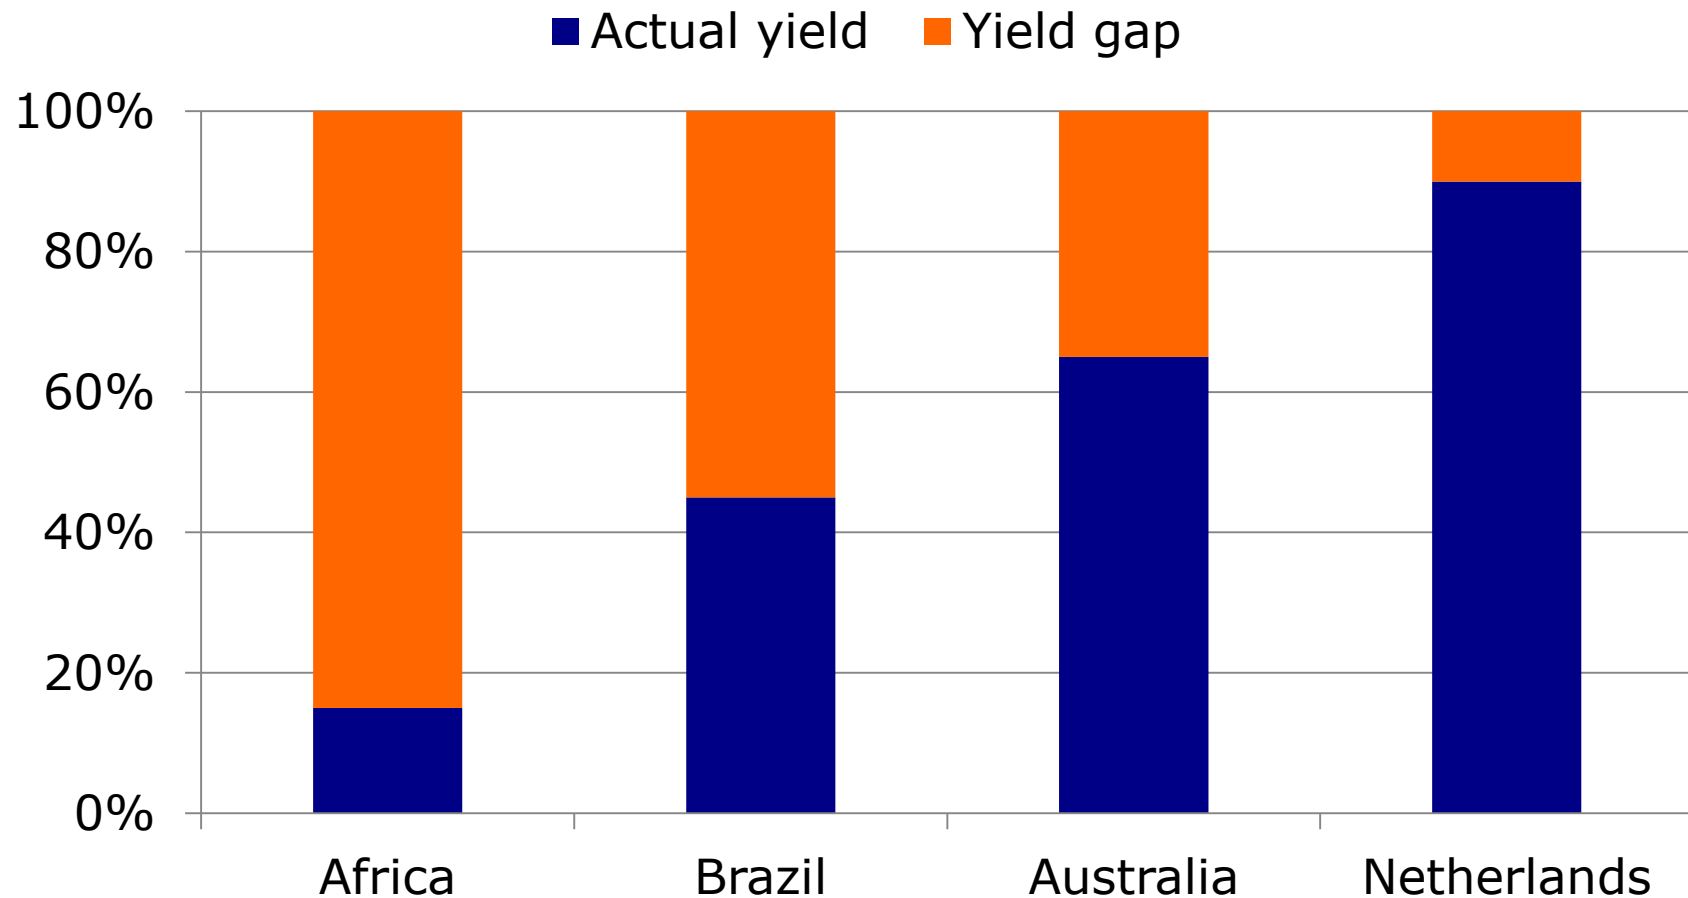

Source: World Bank 2010, Rabobank

However growth regions lack land

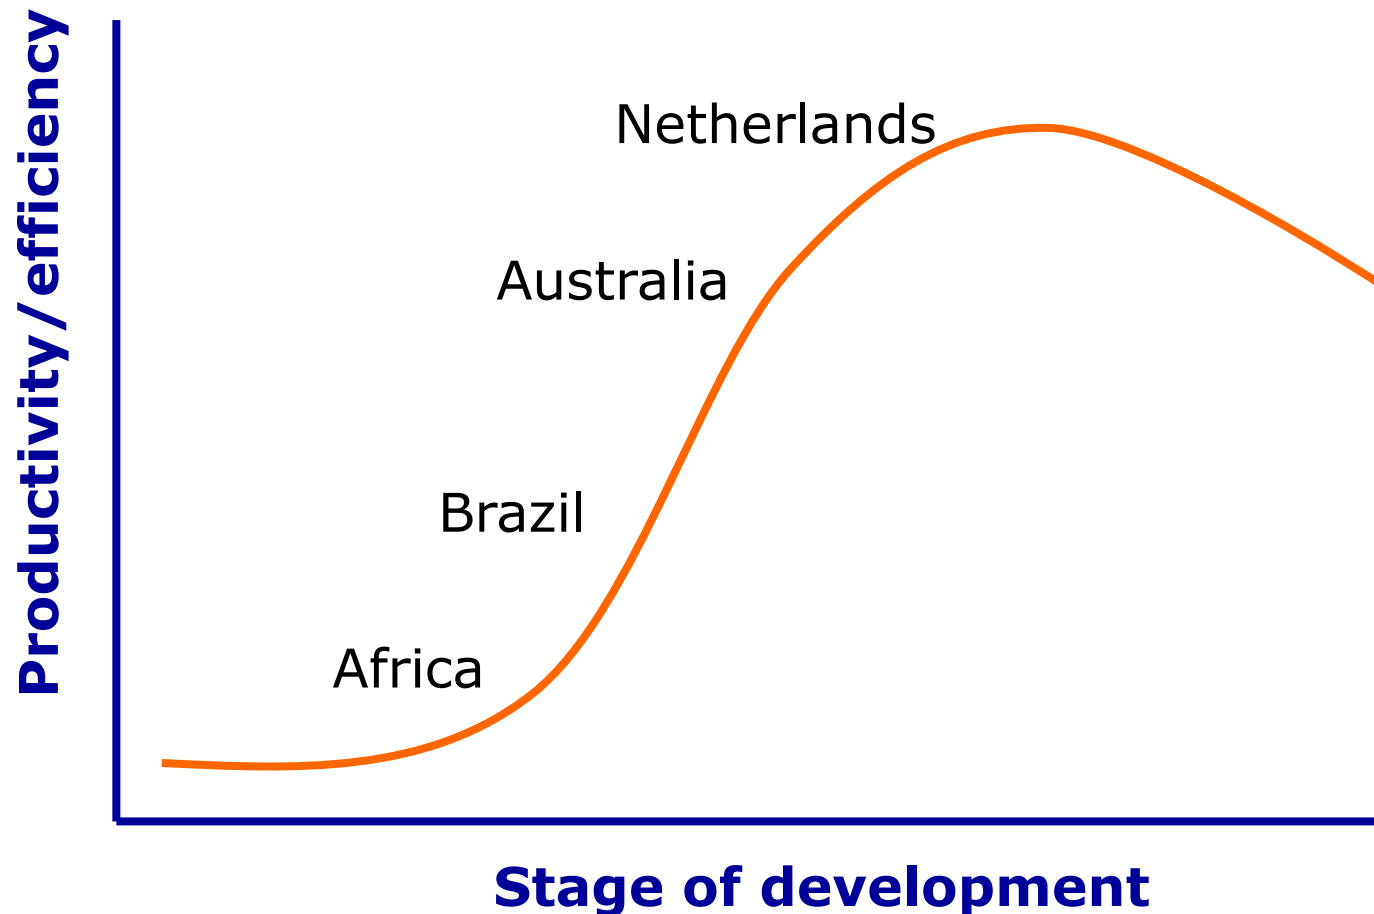

Countries in different stages of agricultural development

Source: World Bank 2010

The Netherlands leading, but competition is catching up

Food Securitya shared responsibility
